

A blood stool test is a test that may use a special kit at home to determine whether the stool contains blood.

Have you ever had this test using a home kit?

Kentucky BRFSS 2001

-----------	-----	----------------------	----------------------

Asked only to respondents age 50 and older.*

#Use caution in interpreting data for total respondents less than 50. N = Cell Size, NH = Non-Hispanic,
%

= Percentage, C.I.(95%) = Confidence Interval (at 95 percent probability level).

Percentages are weighted to population characteristics.

Unless stated differently above, Missing, 'Don't know', and Refused responses are excluded.
